

Prof. Rakesh Goel

Prof. Rakesh Goel is a distinguished Electrical Engineer from **IIT (BHU), Varanasi** with over **57 years of professional experience** spanning heavy industry, project finance, renewable energy, technical education, consultancy, and techno-economic evaluation of industrial and infrastructure projects.

He began his career with **Hindalco Industries Ltd.**, where he gained extensive experience in captive power generation and industrial electrical systems. Throughout his career, he has worked in project appraisal, debt restructuring, industrial finance, renewable energy implementation, and technical consultancy.

Prof. Goel has served as a **Professor at ICFAI University**, specializing in Financial Management and Business Strategy, and has contributed significantly to engineering education and professional training. As **Lead Consultant with Medhaj Concepts**, he played a key role in renewable energy and World Bank-supported RESCO projects and trained over **500 engineers** from Telangana DISCOMs in solar energy applications.

Currently, he serves as an **Independent Techno-Economic Consultant**, empanelled with several banks for appraisal, monitoring, and due diligence of large industrial and infrastructure projects. He continues to actively contribute to discussions on the **power sector, renewable energy, grid stability, infrastructure development, and sustainable growth**.
